## EDUCATION

Baruch College - CUNY Baccalaureate Program

New York, NY

*BA, User Experience Design and Research*

*December 2024*

Relevant Coursework: UX/ UI Design, Research Methods, Programming and Computational, Design and Advertising Layout

The City College of New York

New York, NY

*BS, Psychology*

*December 2022*

Relevant Coursework: Cognitive Psychology, Social Psychology

## EXPERIENCE

### Break Through Tech NY

New York, NY

*Web Development Fellow*

*August 2022*

- Collaborated closely with a cross-functional team, including a PM and Developer, to develop an interactive website, resulting in a fully functional site with enhanced user interactivity, using HTML, CSS, and JavaScript.
- Created detailed wireframes for website designs, ensuring an optimal user experience by applying design-thinking principles and user-centered design strategies.
- Presented project outcomes to an audience of 18 people, including industry professionals, demonstrating presentation and communication skills.

### First Workings

New York, NY

*Intern at Mount Sinai Hospital*

*July 2019*

- Organized and updated patients' medical records, ensuring 100% accuracy and accessibility, by using electronic health record systems along with data entry and management skills.

## PROJECTS

### Bangladesh Donation Website | HTML & CSS, JavaScript

- Developed a responsive demo website using HTML, CSS, and JavaScript to promote awareness and facilitate donations for children in poverty in Bangladesh, focusing on user-centered design for optimal engagement and accessibility.

### Classification Model - Predicting Survival of Heart Failure | Python, Flask, Pandas, NumPy, Matplotlib

- Developed and deployed a binary classification model to predict heart failure survival, achieving an accuracy, precision, recall, and F1-score of 0.84, indicating high model performance and reliability.
